Yes, based on the clarification response from provider, it appears that the course demonstrates ability to work with subject matter experts to calculate the "qualitative impacts" of sustainability program.

Note: Performance 6.b.3 "SF Tool" struck to eliminate redundancy.

Yes, based on the clarification response from provider, it appears that the course demonstrates ability to provide decision makers with better information about the total long-term costs and consequences of a particular course of action.

Request clarification: Please explain how the definition and case studies of the triple bottom line will demonstrate ability to provide decision makers with better information about the total long-term costs and consequences of a particular course of action.

The course demonstrates the role of the business within the larger community, including a module on corporate social responsibility, which is key to impacting community involvement.

11.4.6. Demonstrate ability to participate in the organization's strategic planning at the executive level in order to translate between the organization's missions and its facilities portfolio and clearly communicate how real estate and facilities can support these missions.

Request clarification: Please explain how the definition and case studies of the triple bottom line will demonstrate ability to participate in the organization's strategic planning at the executive level in order to translate between the organization's missions and its facilities portfolio and clearly communicate how real estate and facilities can support these missions.

The course includes many decision-making exercises centered around ethical situations. An ethical decision-making tool is also provided. Together, these resources exercise the student's acuity in seeing the whole picture when considering strategic decisions.

Case study details how a floor-covering manufacturing company focused on sustainability and increased profitability by reducing waste disposal costs and fuel consumption.

Behaving ethically in a sustainability sense has enormous benefits:

- improved financial performance
- reduced operating costs
- enhanced brand image and reputation
- increased sales and customer loyalty
- increased employee engagement
- reduced regulatory oversight
- access to capital
